		8.8kg (19.4lb)

NAME OF INTERNAL FILTERS

FEATURES

Excellent Air Purification

A HEPA filter coated with nano-silver and catechin, anti-bacterial, mold substances, and other filters are designed and installed to remove indoor pollutants in an instant.

Strong Deodorization

The deodorant filter removes harmful gases such as VOCs, formaldehyde, and food/cigarette.

Negative Ion Generation

A great amount of negative ions are generated, allowing users to enjoy forest-like air.

Turbo Mode Operation

The unit purifies the indoor air on turbo mode in a short time, when there is polluted by an

Customized Filter System

Users can choose one of the three filters especially designed for a new house, a child,

Remote Control

The remote control is applied to the user's convenience.

Wall-Hanging Slim Design (Option)

The unit is designed slimly to be hung on the wall and produces a strong decoration.

Rhythmic Cleaning Operation Mode

The rhythmic cleaning operation mode is designed for optimal indoor air circulation and the rapid removal of pollutants.

Silent Operation at Night (Bedtime Mode)

The unit automatically operates on silent operation mode to create a noiseless and pleasant atmosphere at night.

Safety Design for Customers

All operations automatically stop if the front cover is opened. The air intake/outlet is designed to ensure the user's safety and prevent accidents.

Mood Lamp

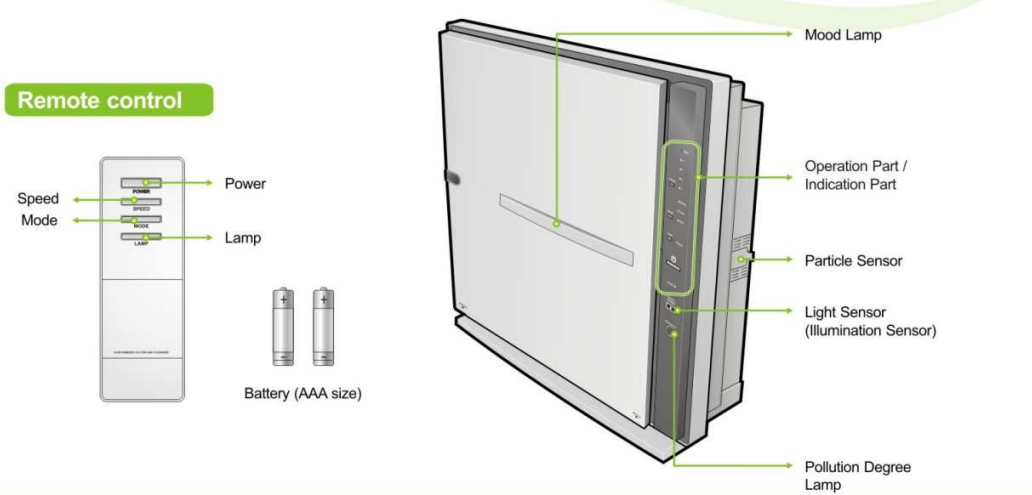

Users can select a color for mood lighting on the front of the unit.

Child Mode

The wind speed is lowered to prevent children from feeling cold.
